**FACT SHEET**

Scale Your Parks With CivicPlus® Recreation Management

> Are you feeling overwhelmed? Our solution automates your processes, allowing you to breathe during the workday.

We're known in the industry for designing a product that makes every parks and recreation process more efficient and organized.

Thousands of municipalities have rigorously vetted our Recreation Management solution for 25+ years.

Here are some benefits our most populated and growing local governments rave about.

Hosting and security

Recreation management (RM) software leverages Artic Wolf and AWS tools to provide monitoring and security controls to all of the connections and Fortinet on the endpoints. You can also elect to purchase dedicated hosting services.

Streamlined digital catalog

Having an easy-to-navigate online catalog is a reality. Residents can self-service by signing up for programs, reserving facilities, and purchasing memberships digitally.

Financial reporting and analysis

Auto-generated reporting is delivered directly to your inbox on your preferred timetable.
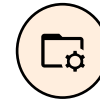

Custom surveys

Automatically send surveys to your participants after programs to gain valuable feedback.

GIS integration

You can identify residency for speedier customer account creation for an additional fee. This function is also used to determine residency vs. non-residency program pricing upon registration.

Document management

For an additional fee, you can request, store, and manage both secure and standard documents for activities and facilities.

Supportive implementation team

Our implementation team walks you through onboarding and stays with you beyond acquisition. It's crucial to our experts that you feel comfortable using our product and get answers should any questions arise.

Save time, money, and resources with CivicPlus®. Today's economy is tough, but our software gives your community room to scale and enhance the civic experience.
