

CivicPlus® Social Media Archiving

Social Media Records Protection for Education

“Social media is a part of our school district’s continuing efforts to listen and connect with families to build a strong school culture. CivicPlus’ Social Media Archiving platform allows us to do this with minimal effort so that we have the time to be more effective at keeping our kids interested in learning, wherever they are.” – **Angela Dice, Central Kitsap School District**

What We Archive

What We Do

Social Media Archiving captures and preserves records from social networks into a secure archive in order to help our customers remain compliant with public records laws.

Why We Do It

Social Media Archiving works to protect freedom of information by allowing school districts the security to moderate social media platforms while still maintaining records for official requests or reviews.

How We Do It

Social Media Archiving interfaces directly with each social network to archive authentic data in an SSAE 16-certified cloud datacenter to create a secure archive that was designed for ease of use and efficient search capabilities.

“A wonderfully, proactive tool.” – **Sherrie Johnson, Stafford County Public Schools**
